# **Project 2- Finance Report**

By Jothi Mani

Assignment -Financial Report Analysis

Financial professionals, investors, and decision-makers often struggle to quickly extract relevant insights from lengthy and complex financial documents such as annual reports, balance sheets, and earnings reports. These documents are filled with jargon, dense numerical data, and intricate details, making it challenging to identify key takeaways efficiently. Traditional methods of analyzing financial documents, such as manual review or static summaries, are time-consuming and prone to oversight. While some AI tools exist, they often lack the ability to provide context-aware, actionable insights specific to the user's goals, making them less effective for quick and informed decision-making.

Report

# Objective

Develop an AI-powered Financial Image Scan System

- Scan and process financial document images to identify and extract relevant content.
- Extract and highlight critical information from financial images, including key metrics, trends, and risks.
- Summarize financial content into concise, investor-focused insights.
- Enable users to focus on actionable data, reducing time spent on document analysis.
- Interpret visual charts/graphs (if present) to support performance evaluation.

# Input

A balance sheet image extracted from:

**Document Title:** Sample Balance Sheet – AlphaTech Solutions Pvt. Ltd.

Reporting Period: As of March 31, 2024

**Source Format:** PDF (image-like tabular format)

#### **■ Output**
